- 10 x Riva Star Step 2 (Green capsule - Single-patient use only)
- 10 x Riva Star Step 1 (Silver capsule - Single-patient use only)

Kits containing

PACKAGING:

Napisan* is not the registered trademark of SDI Limited.

HANDLING STAINS:

1. Using a non-fluoride prophylaxis paste in a rubber cup, clean the toothbrush to be used and abrading teeth.
2. Assess condition of teeth. Only teeth with sound dentine and enamel should be treated.
3. Isolate area to be treated with cotton rolls or rubber dam, or protect the abraded tissue around the affected tooth with petroleum jelly.
4. Using the silver brush provided, pierce through the foil of the green capsule and carefully apply solution to treatment site only.
5. After immediate application, place through the foil of the green capsule and apply a generous amount of the solution to the stain. After 2 minutes, rinse with water. First aid treatment surface initially appears creamy white, keep applying solution from green capsule until it turns clear.
7. Remove all protective/solvent materials used in the mouth.
8. Discard used capsules and brushes after use on a single patient in accordance with local regulations.

DOSAGE:

- Each Step 1 & Step 2 capsule can treat up to 5 teeth per patient.
- Limit of one (1) Step 1 & Step 2 capsule per visit. If needed a second application of Riva Star may be administered after 1 week.

PRECAUTIONS:

for professional use only.

- Due to potential staining, it is recommended that anterior teeth only be treated.
- Patient must be informed of potential staining prior to treatment.
- Avoid contact of solution from silver capsule (Step 1) with oral soft tissue, eyes and skin. If accidental contact occurs, refer to First Aid below.
- Avoid contact of solution from green capsule (Step 2) with eyes.
- Keep out of reach of children.
- Do not ingest.
- Solution from silver capsule (Step 1) will stain (see "STAINS").
- Solution from silver capsule (Step 1) contains 0.06g / mL silver ions.
- Caution: Federal Law restricts this device to sale by or on the order of a dentist.
- Do not use after expiry date.
- Single use only.
- Do not use in patients with ulcerative gingivitis, stomatitis or patients undergoing thyroid gland therapy.
- Do not use on patients with known sensitivity to silver or other heavy - metal ions, fluoride, potassium, iodine or ammonia. Patients undergoing thyroid gland therapy.
- For use in adults over the age of 21.
- Treatment of dentinal hypersensitivity.
- For use in adults over the age of 21.

INDICATIONS FOR USE:

- Riva Star is a new generation desensitizer that immediately relieves tooth sensitivity.
- For professional use only.
- Do not use in patients with ulcerative gingivitis, stomatitis or patients undergoing thyroid gland therapy.
- Do not use on patients with known sensitivity to silver or other heavy - metal ions, fluoride, potassium, iodine or ammonia. Patients undergoing thyroid gland therapy.
- Do not use in patients with ulcerative gingivitis, stomatitis or patients undergoing thyroid gland therapy.
- For use in adults over the age of 21.

CONTRA-INDICATIONS

- Do not use in patients with ulcerative gingivitis, stomatitis or patients undergoing thyroid gland therapy.
- Do not use on patients with known sensitivity to silver or other heavy - metal ions, fluoride, potassium, iodine or ammonia. Patients undergoing thyroid gland therapy.
- Do not use in patients with ulcerative gingivitis, stomatitis or patients undergoing thyroid gland therapy.
- For use in adults over the age of 21.

FIRST AID:

- Eyes (contact): Hold speculum apart and flush the eye continuously with running water. In doubtful cases, consult a medical specialist until referred to a Poison Information Centre or a doctor, or for at least 15 minutes.
- Skin/oral soft tissue (contact): Soak in Napisan* (or other fabric stain remover) overnight and wash per normal. For stubborn stains, saturate hard surfaces that may have come into contact with the solution from the silver capsule. Note: Treatment surface initially appears creamy white, keep applying solution from green capsule until it turns clear.
- Skin: Apply solution from green capsule with gentle rubbing. Stain will slowly disappear. If nothing is done stain will gradually disappear after approximately 4-5 days.
- Clothing: Soak in Napisan* or other fabric stain remover overnight and wash per normal.
- Surfaceauf: Immediately apply household bleach (iodine containing) then rinse with water. For stubborn stains, saturate a paper napkin with household bleach and place over affected area. Leave overnight overnight contact with the solution from the silver capsule. Note: Treatment surface initially appears creamy white, keep applying solution from green capsule until it turns clear.

METABOLISM:

- NDIS is available at www.sdi.com.au or contact your SDI representative.

STORAGE AND HANDLING:

- Do not pene full of silver capsule or green capsule until ready to use.
- Store in a cool and dark place at temperatures between 20° and 25°C (68° - 77°F).
- Use at room temperature between 20° and 25°C (68° - 77°F).
